**Job Req #: 071005262XSWD**

**Job Category: Software Development (Modeling and Simulation Environment)**

XPRT Solutions, Inc. - A DSCI Company, ([www.xprtsol.com/www.dsci.com](http://www.xprtsol.com/www.dsci.com)), is a small high technology company that provides Modeling and Simulation services and products to a large number of Army and other DoD customers and activities. We currently have several positions open at our Eatontown, NJ, headquarters for entry level and experienced SW developers to support a fast paced prototype development environment. Candidates must be US citizens and hold a minimum of a BS degree in Computer Science or Engineering with an advanced degree desirable and must have experience and proven performance in the C/C++ programming language in a Unix/Linux development environment and data structures. Experience and knowledge of communications protocols and the OSI seven layer model (to include interaction between communications layers) is essential and knowledge of wireless communications is a definite plus. Experience in SEI software development processes to include the use of SW configuration management tools is also desirable.

Candidates must have the ability to work in an accelerated team environment, develop real time applications/components, implement components in C++, integrate these components with new and legacy SW components and document SW design and development.

XPRT Solutions is an employee owned company and offers an outstanding employment package, including highly competitive salaries, medical, dental, and vision insurance, tuition reimbursement, and 401K plan with employer contribution.

Please e-mail your resumes with salary requirements to Ms. Janet O'Brien at [jobrien@dsci-usa.com](mailto:jobrien@dsci-usa.com).
